Knowledge Extraction Commission Pacific Environmental Paper Saving Initiative

In an era marked by unprecedented environmental challenges, the Knowledge Extraction Commission (K.E.C.) stands as a beacon of responsibility and commitment to sustainable practices. It is with great pride and a sense of urgency that we introduce the Pacific Environmental Paper Saving Initiative, a bold step toward fostering a greener, healthier planet.

As the custodians of knowledge, we recognize the significant impact of our actions on the environment. The Pacific Environmental Paper Saving Initiative is a testament to our unwavering dedication to mitigating climate change by reducing our paper consumption. The Commission acknowledges the urgent need to address environmental issues, and this initiative serves as a proactive response to the growing concerns surrounding deforestation, carbon emissions, and the overall ecological balance.

At the heart of this initiative lies our profound concern for the well-being of our planet. By championing paper-saving measures, we strive to alleviate the burden of climate change that disproportionately affects our global community. We firmly believe that every sheet of paper saved is a tangible contribution to preserving our precious ecosystems and combating the adverse effects of deforestation.

This initiative is not merely a policy; it is a collective responsibility that extends to each member of the Knowledge Extraction Commission. We recognize that the burden of climate change rests on the shoulders of every employee, and by embracing the Pacific Environmental Paper Saving Initiative, we empower our team to be catalysts for positive change.

Together, let us turn the page to a greener future.

The PEPSI PaperTracker™ indicates that you have almost reached your weekly paper quota. You have 101 pages left.

Phishing Attack Videos

The K.E.C. has indicated that the information in this section is time sensitive.

Late last week, a sophisticated phishing attack was successfully deployed against Isabella Moreau. The associated smartphone was compromised and custom K.E.C. software was installed. We believe that the nature of this information is time sensitive, so please ensure you investigate this as your top priority.

The Smartphone Infiltration Team is currently on vacation, so we do not actually know at this time what the tracking software was supposed to be doing. It uploaded these videos to our secure server, you can find them at the following link:

Hey Dean,

Just wanted to let you know that you have a typo in your signature, it's supposed to be "COMMISSION".

Thanks,

Andrew Lifty

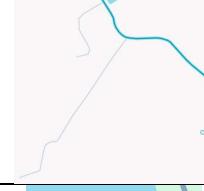

Data Exfiltration

Early this morning, K.E.C. software on Tomáš's computer was able to connect to the internet and begin exfiltrating data. Unfortunately, it seems Tomáš noticed this, and the computer was promptly disconnected. We do not expect any more information to come from this avenue, and it is likely that the Terrorist Cell knows this data has been leaked.

Among the limited data that was able to make it back to us was a communication that appears to be from Malcolm Thompson. We naturally need to decipher the location of these "items" as fast as possible, but if the anecdote about Malcolm's selfie is truthful then we also have a chance at getting a positive identity of the leader of the Terrorist Cell.

The K.E.C. resents the implication that we do not have a chance at decoding this communication. The Commission employs some of the brightest individuals in the country and we take pride in our employees. To aid in this decryption, we filed an emergency subpoena to Google for Photo Sphere data containing these images (ref. 20240108031355). Since emergency subpoenas must have limited scope, we were not able to request all data (especially coordinates). Google has already responded with the information below:

Description	Information	Context
Man sitting while wearing blue shorts	Date: August 2017 Guide: Tomasz Bednarski Type: Photo Sphere Quadrant: NE	
Coastline	Date: January 2019 Guide: CyArk Type: Photo Sphere Quadrant: SW	
Blurry House with Red Roof	Date: May 2021 Guide: Mattsu Supmoni Type: Photo Sphere Quadrant: NE	
Aerial view of Compound	Date: September 2022 Guide: Matthieu Cantin Type: Photo Sphere Quadrant: SW	
White Van	Date: October 2022 Guide: Peng Shi Type: Photo Sphere Quadrant: NW

Commission d'extraction
des connaissances

Hey Team,

The items are complete and hidden - I made extras, so there should be duplicates in case you have trouble finding one when you each get there. You will know what to do with them when you get them.

I am still losing sleep over what happened to Sols, so to be extra careful I have encoded the address via six public Photo Spheres - just combine their coordinates in the usual way. I am confident you will not have trouble figuring it out, but I bet the f*cking commission will not have a chance.

In order:

- I can't tell if this is my brother because it is so pixelated, but we went on a hike at the glacier here when I was really young, and he used to have blue shorts just like that.
 - Buried under this specific rock on this specific island is the entirety of my riches! X marks the spot - or should I say egg?
 - This was the house I was going to buy for all of us to hang out in. It is right by the river and pretty nice. Plans got cut short when I heard they were going to expand the E60 north where it meets the E38.
 - Luckily, it would not get torn down, but I still wanted to avoid all that construction noise.
 - A compound we could hide out in. We'd raise the flag - one star for each of us. And it's right by the ecomuseum! Guess we'd probably have to learn the language though - maybe Vel could teach us!
 - Took a road-trip in the Yukon once. We had to rent this van but it only had 100km worth of fuel so we could just barely make it! We were running on fumes when we made it back to Fox.
- I had fun making up stories about each of these locations - reminded me of late-night chats with Sols. Got a little bored with the last one though, so I thought I would shake it up and made the 6th location my selfie from 2019 - you all know the one: with the flat tire when we were all on vacation heading to Kolente. "Five on Board!" Those were the days...

Subject: Jan7 Purpleberry Materials

Hello Liaisons,

We took a look at the three materials you forwarded us from Purpleberry. We have come to the conclusion that all three pieces of evidence are likely something to do with barcodes. Trust us, it's our specialty.

We'll do our best to try and get something out of them and get back to you.

Thanks,

Thad Yammler

KNOWLEDGE EXTRACTION COMMISSION

Training Exercise

As a constituent office of the Canadian Security Intelligence Service, the Knowledge Extraction Commission is bound by the Canada Labour Code to provide frequent training exercises on ciphers and encryptions to all employees. This includes full time, part time, and contractors.

This exercise gives us context that not all methods of writing text are left-to-right and top-to-bottom. It also teaches us that visual detection aids such as Google Lens are extremely valuable when dealing with data that isn't composed of Latin characters.

**MEMORANDUM TO THE ENGINEERING LIAISON
FOR INFORMATION**

SUBJECT: New Surveillance Access Protocol

SUMMARY

This memorandum is to provide details regarding the new security protocols for accessing surveillance systems.

Hello,

Happy New Year! Unfortunatley we are welcoming you back to the office on a dark note. As a response to the recent breach of security, we've implemented a new security protocol for accessing the various surveillance systems within the K.E.C. Portal. To grant your Liaison accounts access, you'll all be given a unique link to access the system. Simply enter your elevated one-time-passwords from the KEC Security App and your account should be given access.

We've had some phishing attempts already on these, so make sure to only enter the secure passwords into valid **internal** OTP links. For example,

<https://kec.keyclue.ca/otp/3059b4f9-b4d0-46f1-b189-3810b19c3962>

would grant you access to surveillance of the new contractor you are considering.
